Problem & Solution

Why LacDictee exists

The Problem

- Teachers correct dictée by hand
- 1–2 hours per class, per week
- Repetitive, error-prone process
- No structured feedback for students

→

The Solution

- Upload reference text + student photo
- OCR reads handwriting automatically
- Claude AI detects errors
- Instant report with grade suggestion

⚡

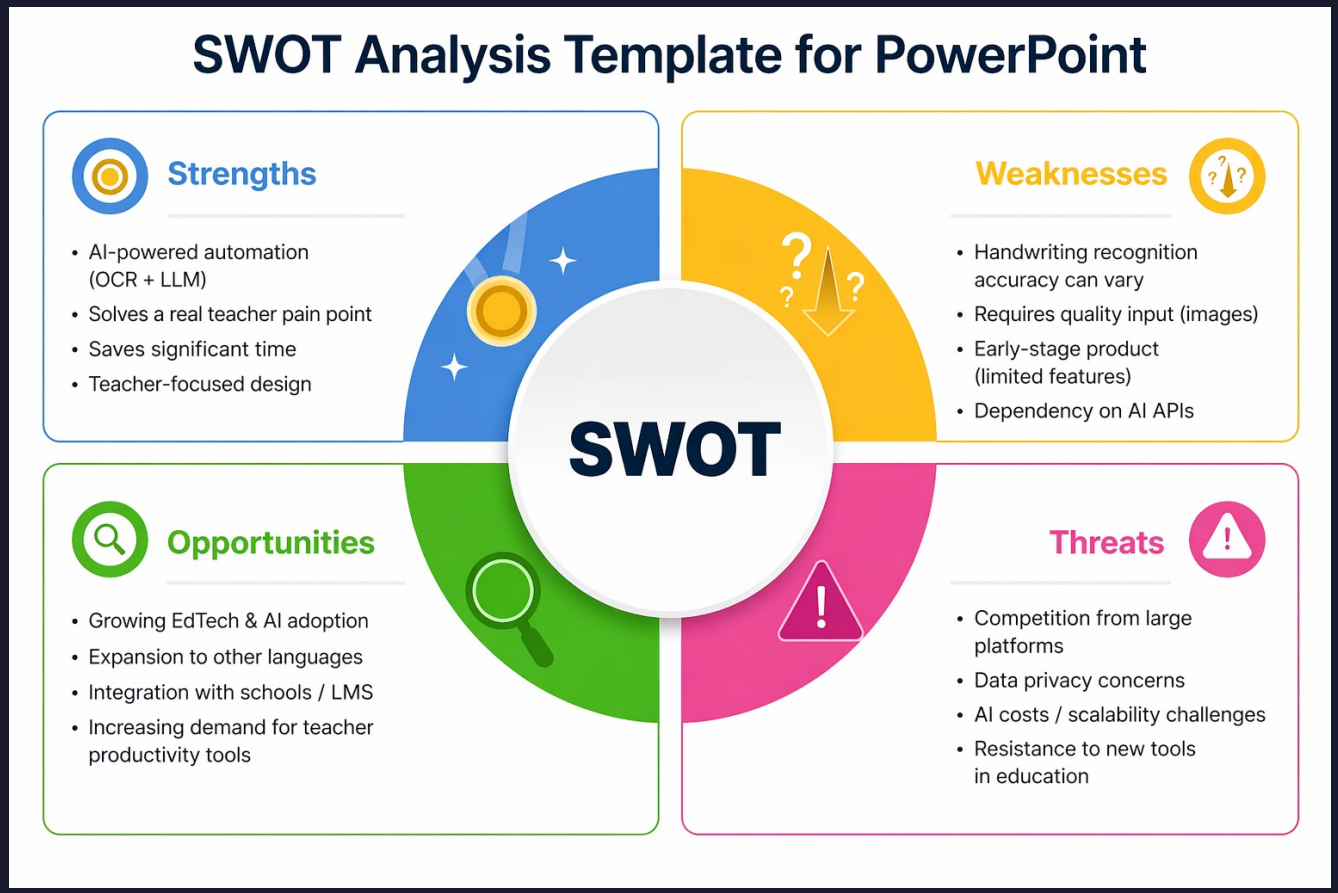
SWOT Analysis

Honest view of where we stand



Key Takeaways

Strength

Real problem, AI-powered, time-saving

Weakness

OCR depends on handwriting quality

Opportunity

EdTech growth + AI adoption wave

Threat

Privacy concerns + big competitors
